

# Why Hush Line?

## ✅ Verified Accounts

We offer verified accounts for journalists, newsrooms, public figures and activists, and organizations so you know your message is going to the right place.

## 🔒 Strong Privacy and Security

From offering users two-factor and using their own PGP key to data being encrypted at rest on our server and Tor onion site support, we go beyond conventional measures to protect you and your data.

## ❤️ Free and Open Source

Hush Line costs nothing to use. Our software is open-source, so you can verify or contribute to the code, too!

## ✉️ Mailvelope Integration

Bring the power of PGP to your web browser. Decrypt messages directly in the app with the Mailvelope browser extension for Firefox and Chrome!

## 💛 Cross-Industry

Confidential reporting is a cross-industry need. Journalists, businesses, and educators need safe ways to receive messages from your community.
